

## GLAZING TIMBER FRAMES

All double glazed units supplied by Universal Trade Frames are to BSEN 1279 – Kitemark License no:KM38664 and must be glazed to the code of practice as laid down by the Glass and Glazing Federation and NHBC.

The primary seal is PIB (which contains Bitumen)

The secondary seal is 2 part polyurethane

Some silicon based glazing products are not suitable for direct contact with edge seal of these double glazed units and may cause breakdown failure or evidence of primary seal “bleed”

Only compatible products should be used such as Hodgsons Silifix U9/Arbosil LM or similar.

We only guarantee our products if the above compatible products are used and no remakes will be offered free of charge under the terms and conditions we provide for this problem.
